

DURAFRESH is hygienic & self-sealing film that stretches to seal. It preserves the freshness of the food with a perfect wrap and easily unwraps without leaving any adhesive residue.

Key Features

- Made of LDPE and not PVC, as PVC film contains harmful plasticizers named phthalates which are toxic and thus, PVC Cling Films are already phased out in many countries.
- It is more than 25% lighter compared to traditional PVC, this means less waste and remarkable reduction of environmental impact.
- Excellent Cling, stretches to seal and hence greater Mileage per roll.
- Non-Toxic & Odorless, it does not contain any chlorine or any plasticizers.
- Raw Material used complies with the standard IS : 10146 " Safe for food Contact " and complies with FDA:CFR title 21-177.1520 Olefin Polymers.
- Available With Easy Tear Function on requirement / Micro - Perforated Films.

Microwave &
Refrigerator safe

Preserves aroma and
moisture of food

Can be used for cosmetic purpose
It is safe for skin

DURAFRESH oxo-Biodegradable cling film contains additives that initiates and accelerates the breakdown if exposed to direct sunlight, ultimately reducing it to carbon dioxide, water and biomass. If the film is not exposed to direct sunlight, it will virtually retain all of its mechanical properties.

Key Benefits

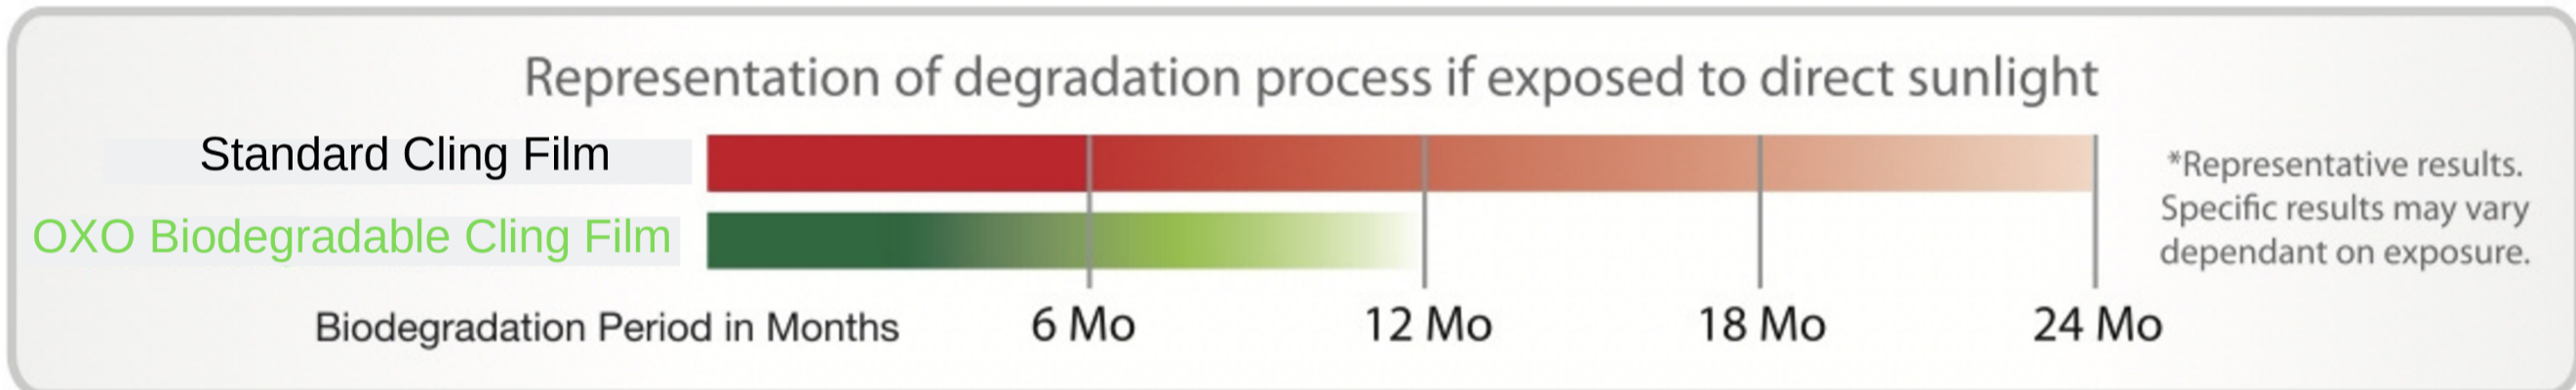

-  Identical performance to normal cling films.
-  Fully recyclable, ensuring sustainable environmental solution.
-  Engineered to biodegrade if not disposed off properly.

100% RECYCLABLE

SAFE FOR FOOD USE
