MADE IN INDIA

DURAWRAP™

SILAGE FILM

FEATURES AND BENEFITS

3 & 5 LAYER TECHNOLOGY

Specially selected high quality polymers are directed to the film layer where they are most needed to ensure the production of an advanced silage film with superior performance characteristics.

HIGH PUNCTURE & TEAR RESISTANCE

100% imported octane grades with advance polymers ensures tough silage film for outdoor performance.

IMPROVED ELASTICITY & ADHESIVE STRENGTH

Careful selection of additives and tackifiers ensures instant adherence between film layers which helps to keep excellent bond during bale storage.

UV STABILIZED & UNIFORM OPACITY

Manufactured to withstand outdoor exposure for 12 months with improvised UV content and consistent opacity, thus improving fermentation.

IMPROVED OXYGEN BARRIER = IMPROVED SILAGE QUALITY

The 3 & 5 layer construction ensures the production of a higher density silage film that minimizes gas permeability across the total surface of the film. This in turn optimizes the silage fermentation process.

DURAWRAP™

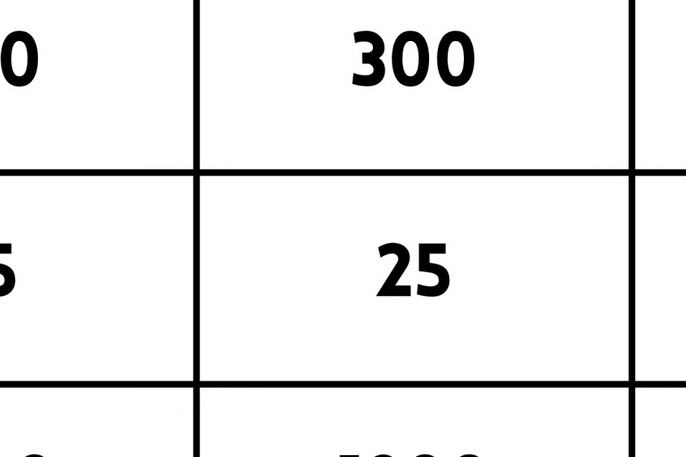
SILAGE FILM

SPECIFICATIONS

WIDTH (mm)	250	300	500	750
THICKNESS (µm)	25	25	25	25
LENGTH (meter)	1800	1800	1800	1800
PAPER CORE ID (mm)	76	76	76	76

*Customized orders can be made on request.

Available in 4 Colours



5 LAYER CO-EX

100% RECYCLABLE
